## Product Overview

The Digitalinx DL-1H1A1U-B HDBaseT 2.0 extender set transmits HDMI, audio , USB High Speed (up to 190Mbps) and RS232 over single category 6 twisted pair cable. The DL-1H1A1U-B can transmit 4K resolutions up to 4K@60Hz, 4:2:0 up to 40m / 120' and 1080P up to 70m / 230'. The 3.5mm audio input/output circuit is completely separate and is not dependent on the HDMI or USB input source to be activated. The Digitalinx DL-1H1A1U-B is HDMI 1.4b and HDCP 2.2 compliant and supports CEC pass through.

The DL-1H1A1U-B HDBaseT receiver or transmitter can power the entire HDBaseT extender set so there is no need for an external power supply to be used on both transmitter and receiver.

The DL-1H1A1U-B is sold only as a set. The individual transmitter and receiver are not compatible with other HDBaseT devices due to proprietary PoE circuitry.

# Cabling Requirements

## HDBaseT Cabling

To ensure proper performance of the DL-1H1A1U-B, it is recommended that you use solid core, shielded Category 6 F/UTP cabling at a minimum. Category 5e F/UTP may perform well but may not support power over HDBaseT reliably.

When using shielded category cabling *ALWAYS*...

....use shielded connectors

....properly ground the category cable

For optimized HDBaseT performance use the following Liberty Wire and Cable branded cabling;

Category 6 plenum; **24-4P-P-L6SH**

Category 6A plenum; **24-4P-P-L6ASH**

Category 6 NON-plenum; **24-4P-L6SH**

Category 6A NON-plenum; **24-4P-L6ASH**
